## Summary

iOS Developer with **2+ years** building production apps for **banking, insurance, and travel** sectors. Expert in **SwiftUI, UIKit, MVVM** with payment integration (Stripe, Apple Pay) and AI features. Led UIKit-to-SwiftUI migrations and delivered apps serving **millions of users**. US client experience with strong remote collaboration skills.

## Technical Skills

**iOS:** Swift, SwiftUI, UIKit, watchOS, MVVM, Clean Architecture, async/await, Combine  
**Integration:** REST APIs, Alamofire, Stripe, Apple Pay, Google Maps SDK, Firebase, SSE Streaming  
**Tools:** Xcode, Git, CocoaPods, SPM, TestFlight, Core Data, JIRA, Agile/Scrum

## Professional Experience

### iOS Developer

April 2024 – Present

NeoSoft Technologies, Mumbai

- Develop and maintain **iOS and watchOS applications** for enterprise clients across banking, insurance, travel, and automotive sectors.
- Collaborate with **US-based clients** in agile sprints, participating in daily standups, sprint planning, and code reviews across time zones.
- Architect scalable solutions using **MVVM and Clean Architecture** patterns, ensuring code maintainability and testability.
- Lead **UIKit to SwiftUI migrations** and dependency modernization (CocoaPods to SPM), reducing build times by **25%**.
- Integrate third-party SDKs including **Stripe, Apple Pay, Google Maps, Firebase**, and AI-powered chat systems.
- Conduct **code reviews, mentor junior developers**, and document technical specifications for cross-functional teams.

## Key Projects:

### Cinko – Hotel Booking Platform

US Client — SwiftUI, Stripe, Google Maps

- Architected complete **hotel booking flow** from search to payment confirmation using SwiftUI and MVVM.
- Implemented **radius-based hotel discovery** with CoreLocation, Google Places API, and interactive maps.
- Integrated **Stripe & Apple Pay** payment gateways achieving **99.5%** transaction success rate.
- Built **AI-powered chat assistant** with real-time SSE streaming and multi-provider authentication (Google, Apple Sign-In).

### Tata Motor Fleet Edge – watchOS App

SwiftUI, WatchConnectivity, SSE

- Developed **Apple Watch companion app** with bi-directional sync via WatchConnectivity framework.
- Implemented **speech-to-text AI chat** and real-time driving behavior analytics for fleet safety monitoring.

### Tata AIG Insurance App

UIKit, MVVM, MapKit

- Developed **policy management, claims processing**, and network locator features with secure document handling.

### Union Bank of India App

UIKit, Performance Optimization

- Resolved critical production bugs and optimized performance ensuring **zero downtime** for millions of users.

## Education

B.Tech, Computer Science & Engineering – MIT ADT University, Pune

2018 – 2022

CGPA: 7.16/10

Software Development Specialization – Scaler Academy

2022 – 2024

Top 10% Performer — DSA, LLD, HLD, SQL Certified

## Languages

English (Professional Proficiency) — Hindi (Native)

## Certifications & Achievements

### Scaler Academy Certifications:

- Data Structures & Algorithms
- Low-Level Design (LLD)
- High-Level Design (HLD)
- SQL Database Management
- Python Programming

### Key Achievements:

- Top 10%** in Scaler programming challenges
- Solved **500+ DSA problems**
- US client** collaboration experience
- Apps serving **millions of users**
- Led **UIKit to SwiftUI** migration
